Stop the student after 60 seconds. You would also need to count the number of errors he/she makes while reading and know which word he/she stops on.

Fluency Rate Formula if Student Reads for 60 Seconds

Total Words Attempted in Story in 60 Seconds	-	# Errors	=	Fluency (WCPM)
	-		=	

Use the table below if the student finishes the passage before 60 seconds have elapsed.

Fluency Rate Formula if Student Completes Passage in Less Than 60 Seconds
